How to read the ACES/ACES+ Workshop Schedule:

We have developed our curriculum based on the **National Healthcare Foundation Standards and Accountability Criteria**.

Dates: We will try to stick to the 3rd Saturday of the month. The actual **workshop** date may have to be somewhat flexible to accommodate our presenters or partners. (For example: We may change the date that we go to AIMS if they are not available on September 26th, but we would then have some other workshop on that date.)

Cost is the cost to ECMO AHEC in addition to indirect costs, materials, staff and refreshments, etc.

Workshop is the proposed workshop for the 2009/2010 year.

We also plan to include the following types of exercises in all of our workshops:

- 7 Habits of Highly Effective Teens/ Team Building/Developmental Assets
- Medical Terminology (including roots, prefixes, and suffixes)
- Dissections
- YHSC (Youth Health Service Corps) Curriculum developed by the Connecticut AHEC
- Health Literacy Curriculum for high school students was recently developed by the Southwest Missouri Area Health Education Center at Missouri State University.
- HC101 (Health Careers 101) and/or American Careers Curriculum focus on introducing various Health Careers to high school students.
